JUMO eTRON M Electronic Microstat

76 x 36 mm format

Brief description

The JUMO eTRON M is a compact, digital electronic thermostat for simple temperature control (heating or cooling). The measurement input permits the connection of resistance thermometers or thermocouples, or standard current or voltage signals. The measured value is shown on a 3-digit backlit display. The switching states of relays K1 and K2 are indicated by two LEDs.

The instrument incorporates a simple defrosting function as well as an operating hours counter, which can, for instance, be used to record the operating time of a cooling compressor.

The instrument can be operated from 4 keys on the front panel. The electrical connection is made via screw terminals on the back of the instrument.

A setup program and a PC interface are available as accessories, for simple configuration and parameterization from a PC.

Displays and controls

Type 701060/XX2...

Key features

- Integrated defrosting function
- Heating or cooling is configurable
- Limit monitoring
- Available for resistance thermometer, thermocouple, standard current or voltage signals, according to choice
- Choice of a 10A relay or two 5 A relays
- Adjustable switching hysteresis
- Time-delayed switch-on after power-on is selectable, e. g. for staggered starting of several equipment units
- Operating hours counter
- Symbols for operating modes, °C, °F, hours, minutes and seconds in display
- Parameter level protected by code
- Setup program for configuration and archiving via PC
- Customized linearization via tabular function in the setup program
- UL approval

LC display	3-digit segment display, 13 mm high, and symbols for temperature unit, h, min, s, defrosting and heating, with red background lighting	
Status indication	LED K1/K2 lights up when relay K1/K2 is energized. LED K1/K2 goes out when relay K1/K2 is de-energized.	
Keys	for start-stop	0
	(P) programming	
	 increase parameter value decrease parameter value 	
Setup interface	The instrument is linked to the PC via a PC interface with TTL/RS232 converter and adapter (3-pin).	

Technical data

Measurement	Designation	Measuring range	Meas. accuracy ¹ / ambient temperature error	Recognition of	f
input				Probe short-circuit	Probe break
Resistance	Pt100 EN 60 751	-200 to +600°C	0.1%/ ≤100ppm/°C	is recognized	is recognized

	4 — 20 mA	2.4 to 21.6 mA	0.1%/ ≤100ppm/°C ³	is recognized	is recognized
		scalable with 5.cL and			
		5.c H			
Input resistance R _{IN}			-	•	-
Voltage	0 — 10 V	-1 to 11 V	0.1%/ ≤100ppm/°C	-	-
		scalable with 5.c.L and			
		5.c H or customer table			
Input resistance R _{IN}					
1.) The accuracies refer 2.) valid from -50°C	to the measuring range span.				

3.) A valid customer table must be entered via the setup program and changed over to ER_b in the instrument. This may reduce the measuring accuracy.

Additional data

Sampling time	250 msec
Input filter	1st order digital filter; filter constant dF adjustable from 0.1 – 99.9sec
Measurement offset	adjustable from -99.9 to +99.9 via the parameter DF.E
Special features	display of temperature unit: °C, °F (Fahrenheit) or switched-off
Customer table	The setup program acquires a maximum of 20 value pairs and uses them for the linear interpolation of 20 new calibration points.

Ambient conditions

Ambient temperature range	0 to +50°C, with side-by-side mounting: 0 to +40°C
Storage temperature range	-40 to +70°C
Climatic conditions	\leq 75 % rel. humidity, no condensation
Cleaning and care of front panel	The front panel can be cleaned with all the usual cleaning and rinsing agents. Do not use solvents such as methylated spirit, white spirit, P1 or xylene!

Output

1 relay (changeover contact)	150,000 operations at 10A 250V AC 50Hz resistive load
for Type 701060/XX1-XX	
2 relays (make contacts)	100,000 operations at 5A 250V AC, 50Hz resistive load
for Type 701060/XX2-XX	

Supply

Supply voltage	230V AC +10/-15%, 48 - 63Hz or 115V AC +10/-15%, 48 - 63Hz (isolated from measurement input)
	12 - 24V DC +15/-15%, 24V AC +15/-15%, 48 - 63Hz (not isolated from measurement input)
Power consumption	<3VA

Housing

-	
Material	polycarbonate
Mounting	in panel cut-out with bezel seal
Operating position	unrestricted
Weight	approx. 160g
Protection	front IP65, rear IP20
Flammability class	UL 94 V0

Electrical data

Data backup	EEPROM
Connection	via screw terminals for wire cross-section up to 4 mm ² solid wire and 2.5 mm ² stranded wire
Electromagnetic compatibility interference emission immunity to interference	product family standard: EN 61 326 Class B to industrial requirements
Operating conditions	The instrument is designed as a panel-mounting unit.
Electrical safety	to EN 61 010, Part 1 overvoltage category III, pollution degree 2

factory-set

1.) It is not possible to switch from one meas. input group to another

Suitable transducers can be found in these data sheets:

- 90.2005 Push-in resistance thermometers
- 90.2105 Screw-in resistance thermometers
- 90.1002 and subsequent ones for screw-in thermocouples
- 90.1101 and subsequent ones for push-in thermocouples
- 90.1221 Mineral-insulated thermocouples

Accessories

Setup program, multilingual PC interface with TTL / RS232C converter and adapter (pins)
